

Optimise dairy solids with whey **PERMEATE**

The Market

Whey permeate is a fast moving ingredient within dairy. Simply because it is the **most cost effective** dairy solid on the market, capable of replacing sweet whey powder, lactose and skimmed milk powder. Whey permeate is even more price attractive than lactose.

Whey permeate is a dairy solid with a defined CODEX standard. It is to be labelled as whey permeate*

*Consumer study available on how whey permeate is perceived when put on the label.

Benefits of our whey permeate

Beats other bulking agents on quality and taste. The balanced mineral profile of our whey permeate provides a sweet and milky taste in your product. The excellent free flowing powder properties facilitates easy implementation on your production line.
